1

Service Component Architecture

Composite Application Modelling

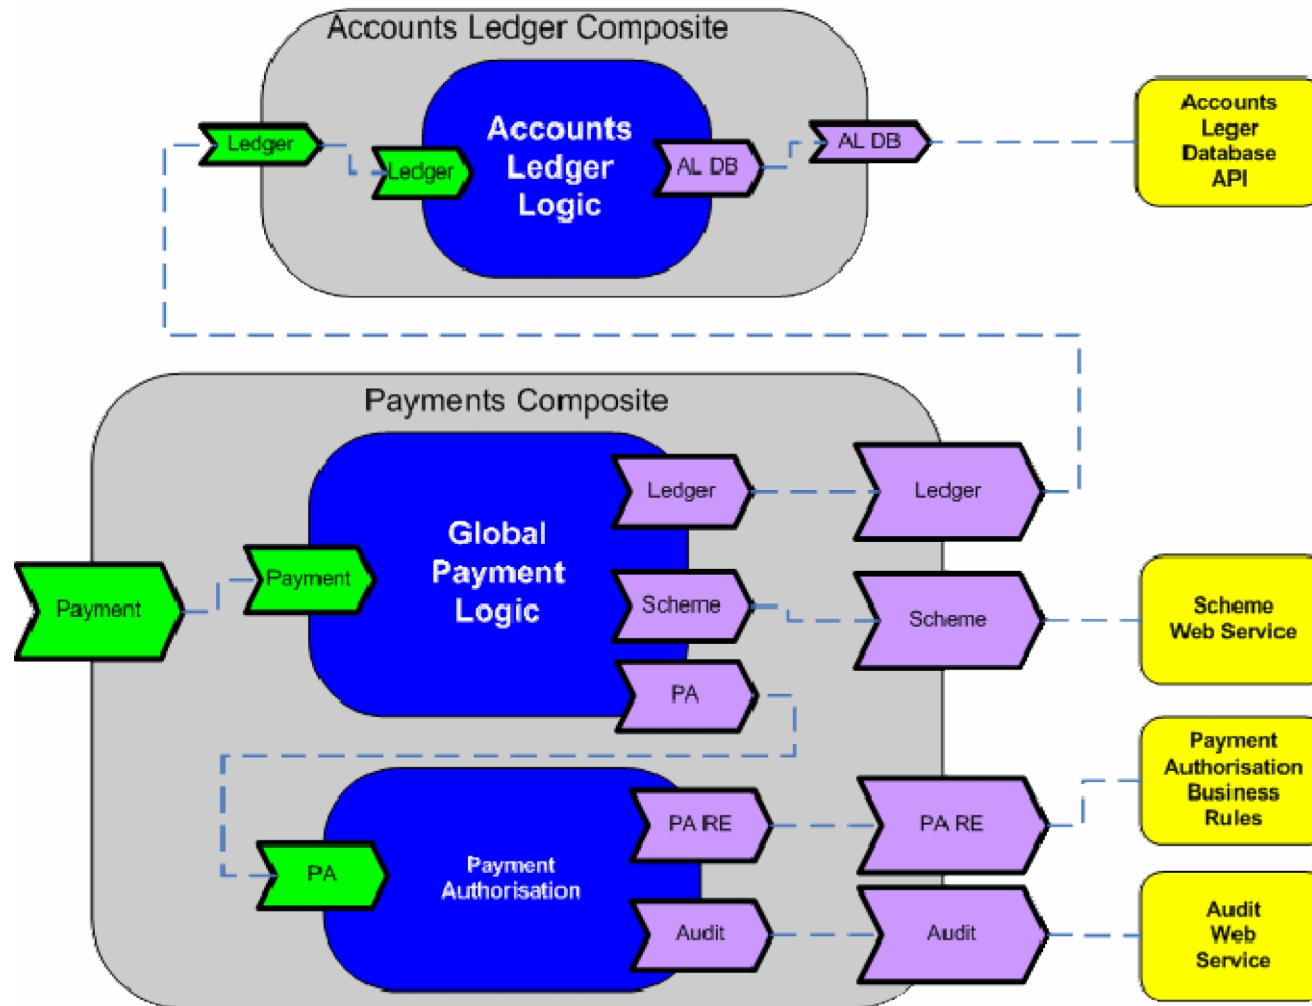

- Open standard to enable Service Oriented Architecture

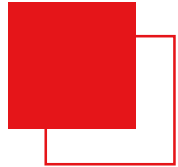

- Technology independent and environment neutral
 - Multilingual: Java, Spring, BPEL, C++, PHP, XML, PHP, etc.
- Decouple application business logic from interfaces
 - Binding to standards-based technology e.g. SOAP, REST, JSON
 - Synchronous, asynchronous, notification, request reply
- Policy based quality of service NFR's e.g. Security, audit, transactions

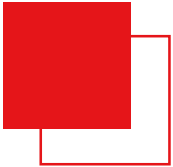

SCA Specification Model

SCA Full Lifecycle Support

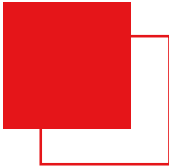

So why are we not talking about SCA?

SCA is Everywhere

SCA and JBoss SwitchYard
