

UnifiedPush Server: Mobile Push Middleware

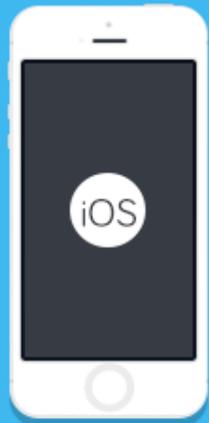

Tadeas Kriz

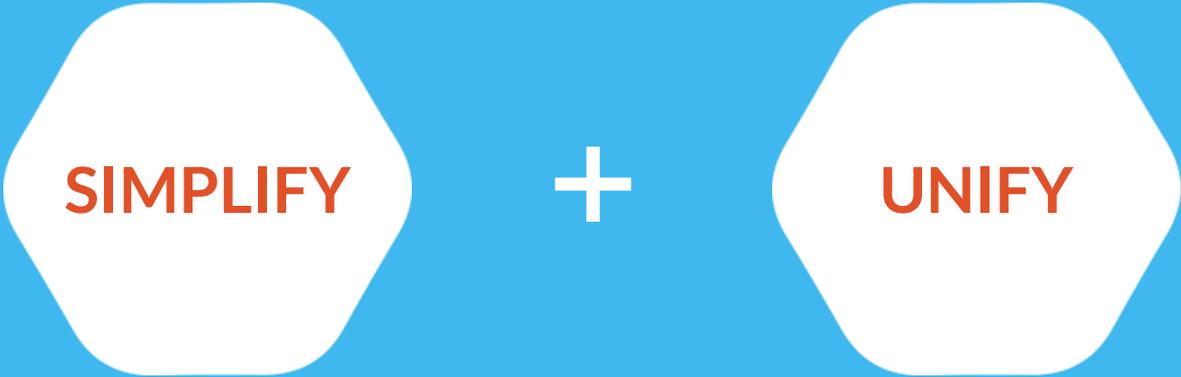

I'm a passionate developer, dreamer and workaholic. QE at Red Hat during the day, mobile developer at Brightify during the night. I also love open source and have created an ORM library called Torch.

What's AeroGear?

Umbrella project

Main purpose?

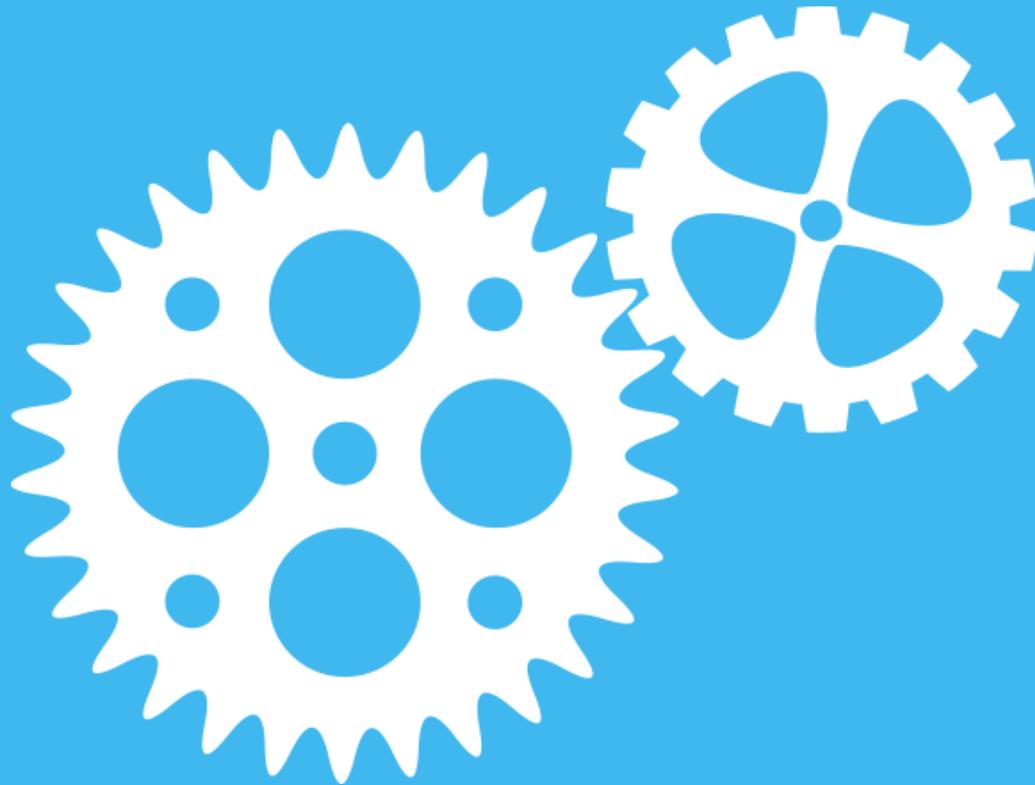

SIMPLIFY

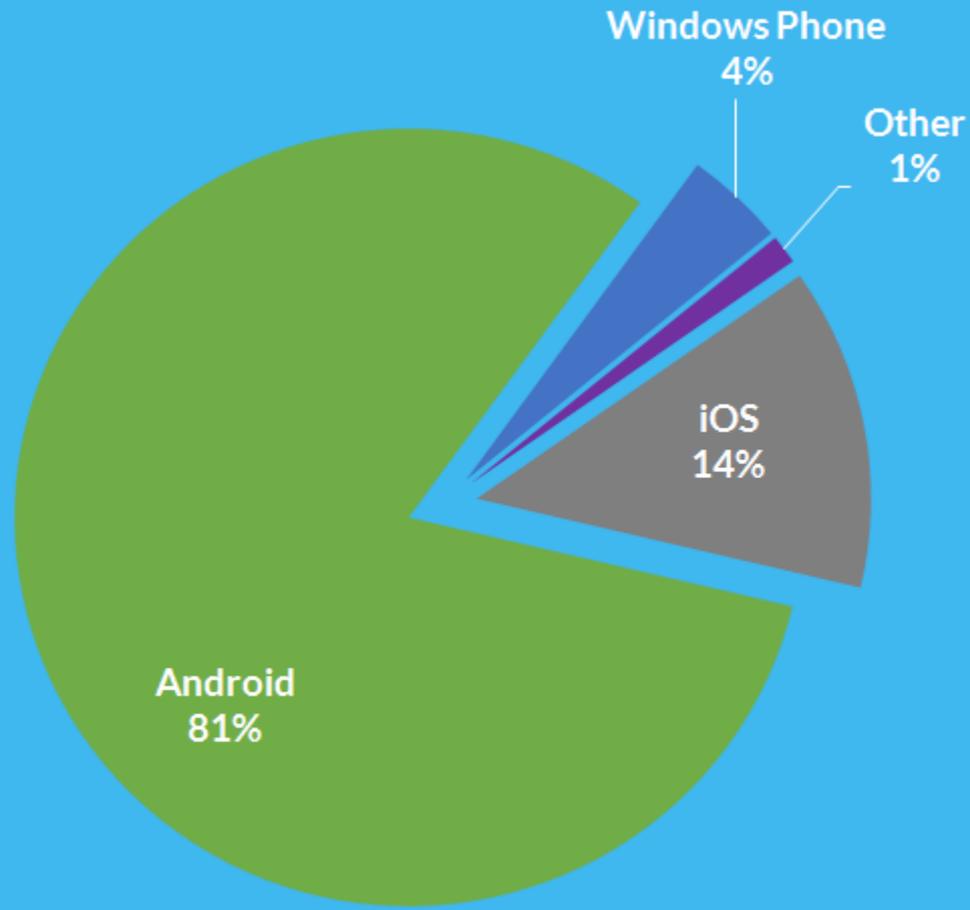

+

UNIFY

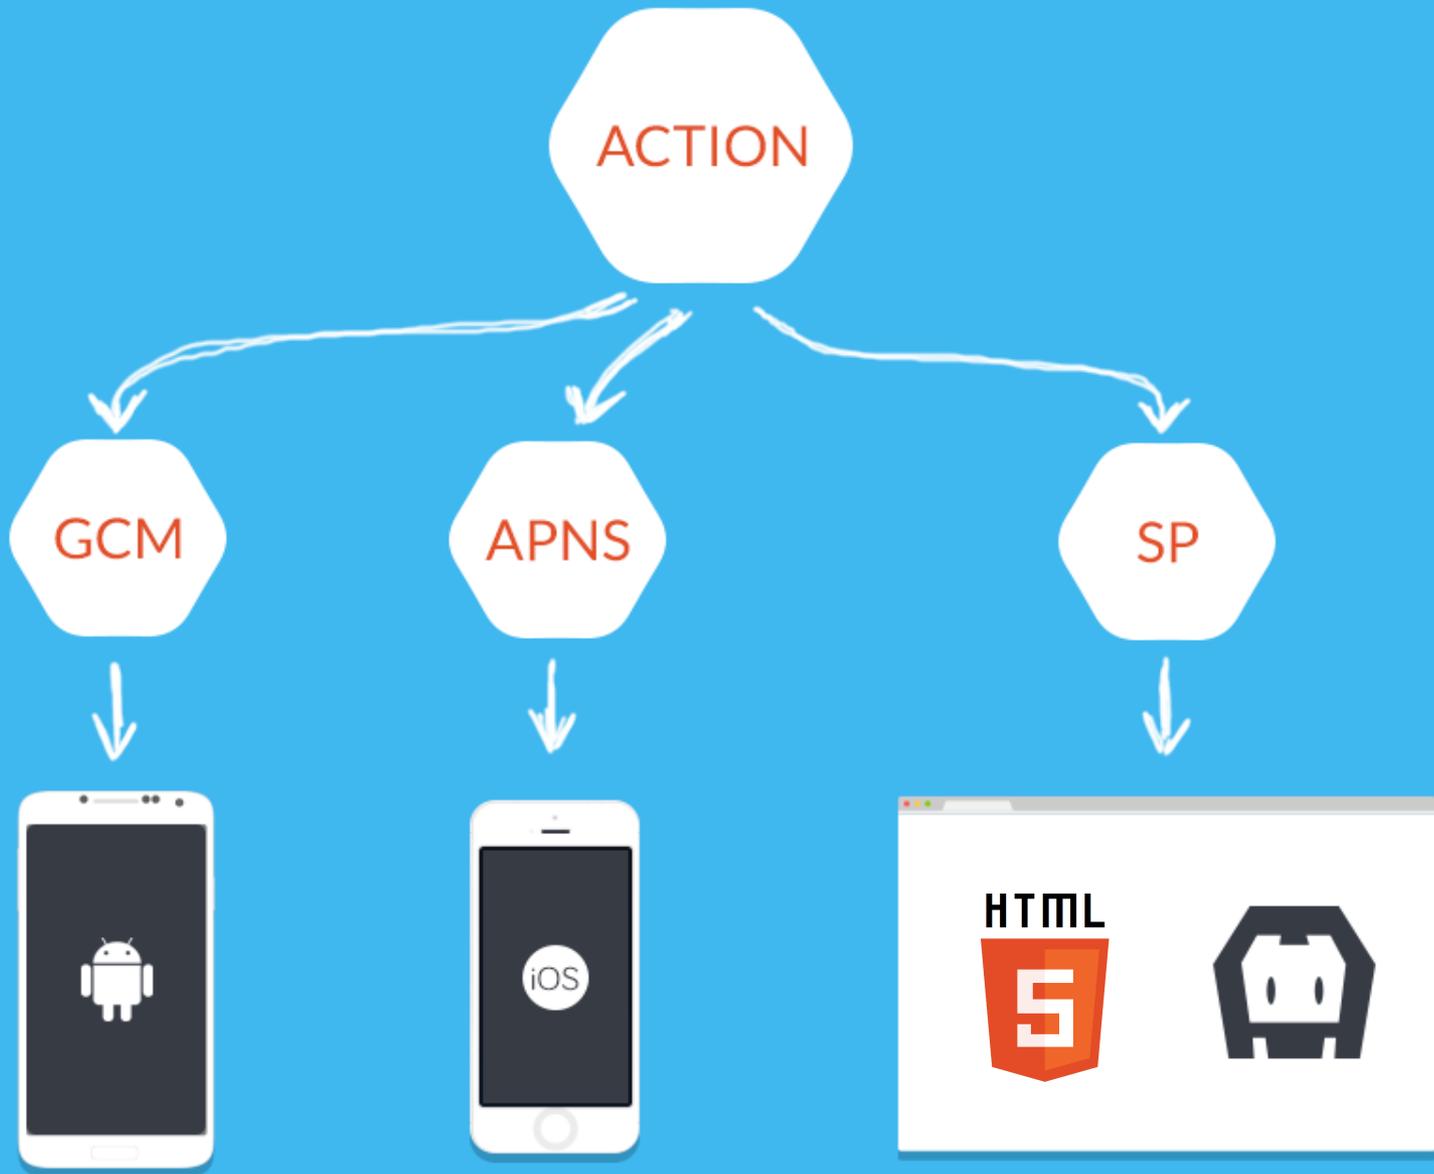

Don't reinvent the ^{gear}~~wheel~~

Mobile market share

Without UnifiedPush Server

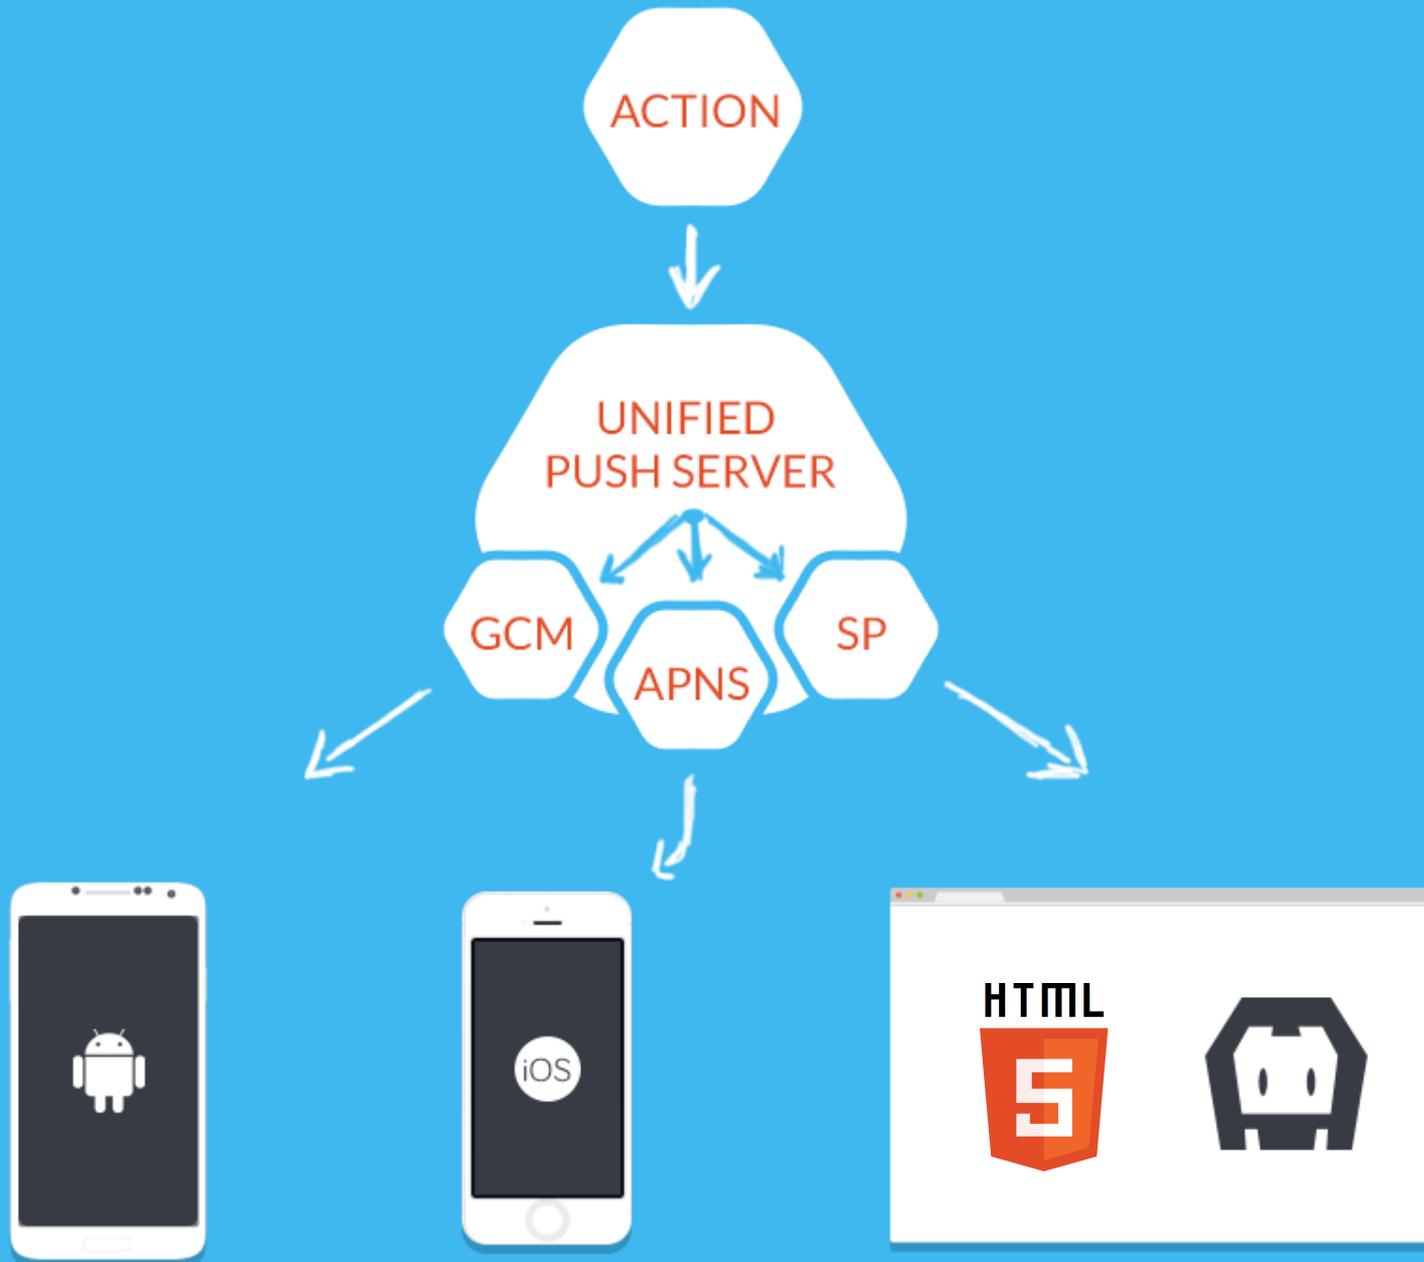

What does it mean to you?

Lot of code for each platform

Server code for device registrations

Coverage of platform differences

UnifiedPush Server for the rescue!

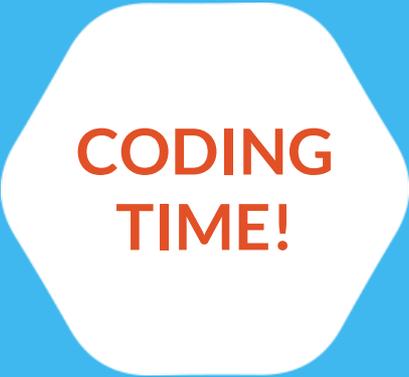

How to set it up?

OpenShift

Local instance

**WALK
THROUGH**

**CODING
TIME!**

Testability

Unit tests

Integration tests
