## Windup (Migration Tools)

### What's Windup?

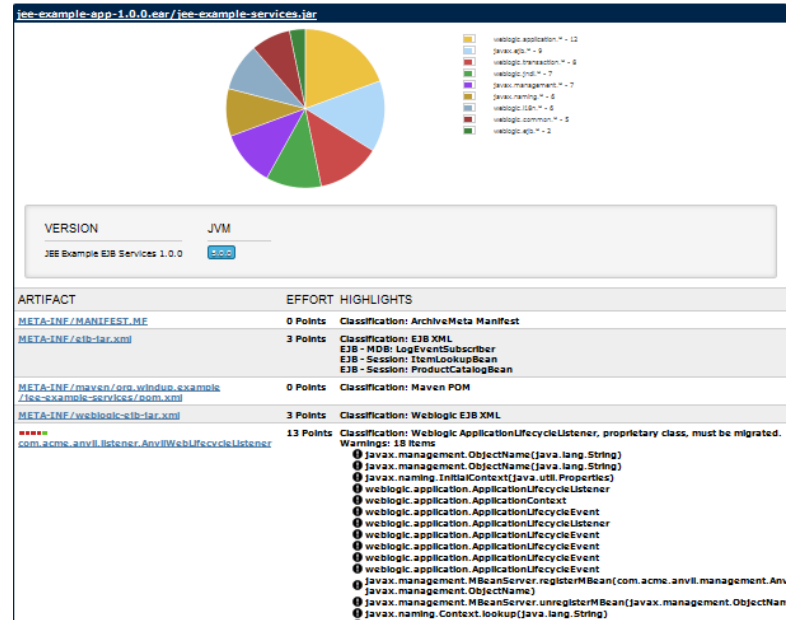

Windup is a tool to scan and report on your JEE application. It's fast, free, and open source!

### Who's It For?

Created to assist developers estimate and migrate their applications to JBoss. Don't worry, you'll love it.

### Where Do I Begin?

It's simple. Run Windup against either your source or compiled archive. Then, just browse the report!

# Open Shift

- ◆ Python
- ◆ Ruby
- ◆ Node.js
- ◆ Perl
- ◆ Php
- ◆ DIY
- ◆ JBossAS7
- ◆ Jenkins-1.4

Many organizations want the benefits of both public and private clouds: A hybrid cloud

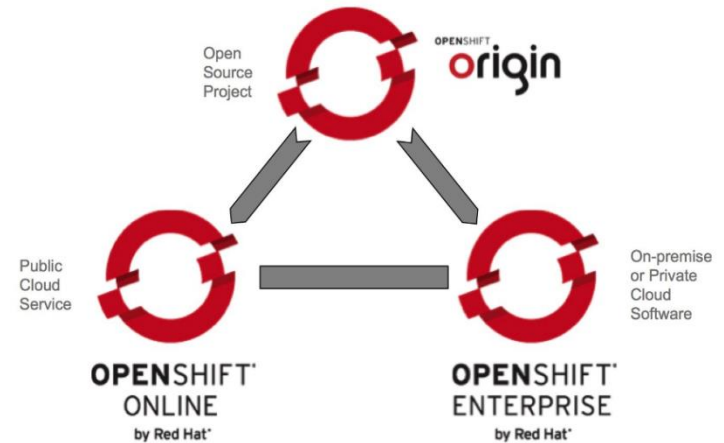

- Faster to deploy
- Not as secure
- Externally controlled

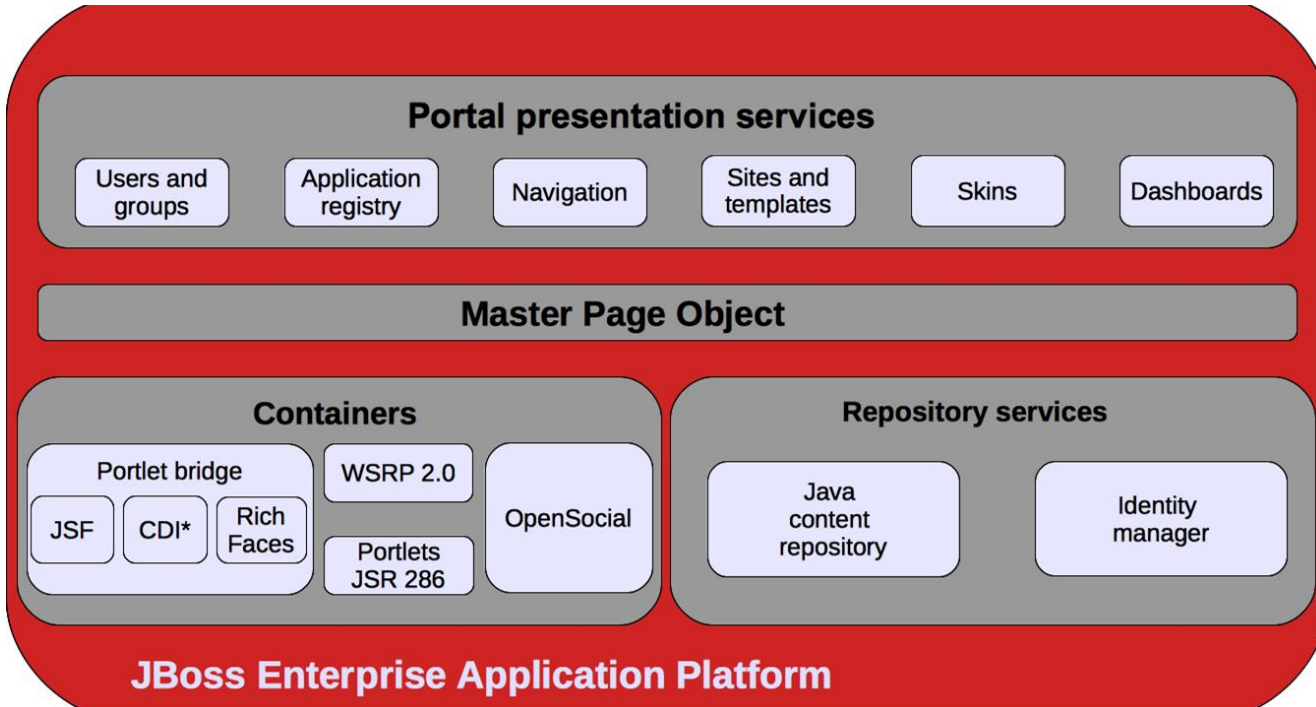

- Choice of environment per project
- IT managed

- Slower to deploy
- Very secure
- Internally controlled

- ◆ PostgreSQL
- ◆ Mongo DB
- ◆ mySQL
- ◆ mariaDB

# Portal

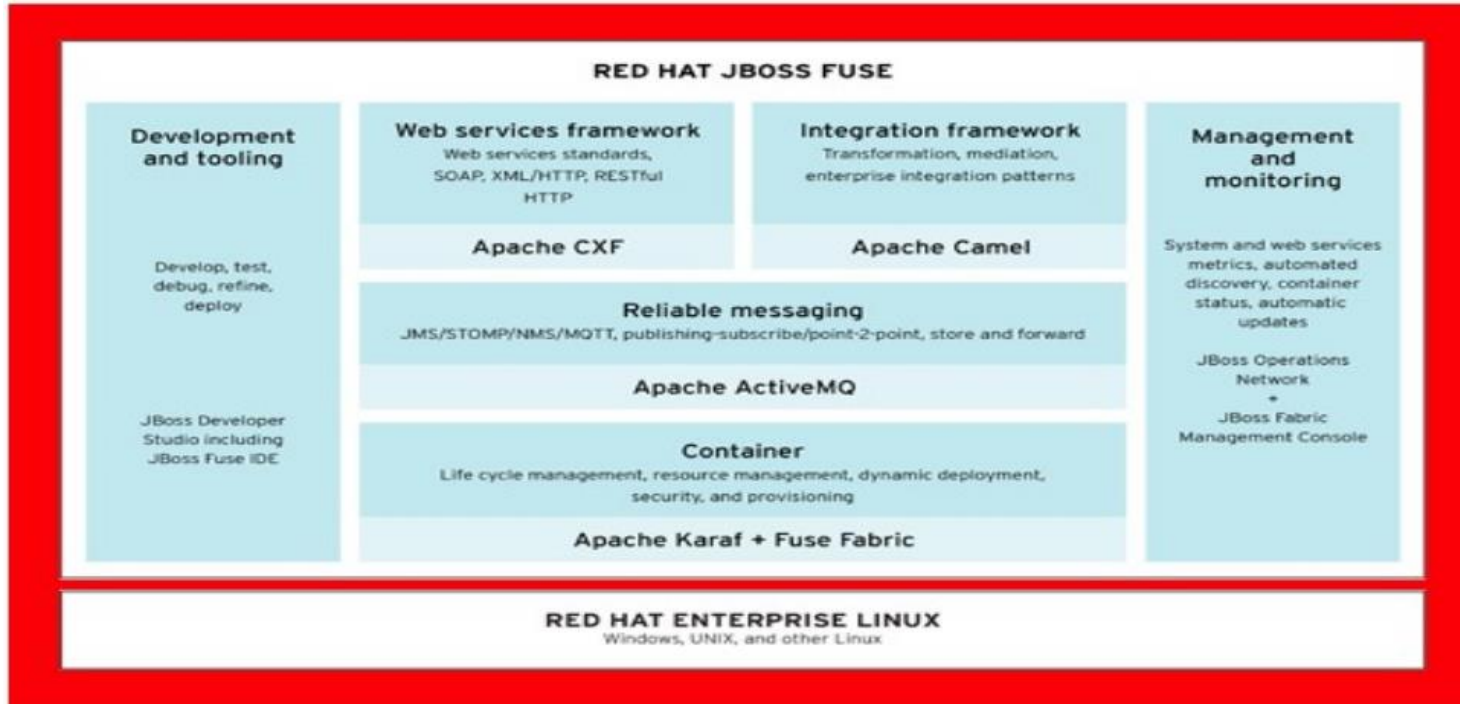

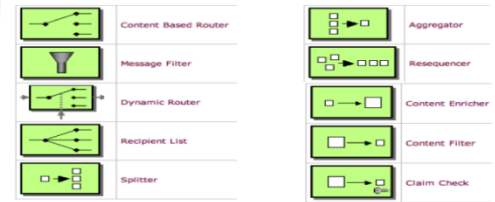

# BRMS

- ◆ BMS-6 Preview
  - ◆ Polymita Frontend-Erfahrungen integriert
  - ◆ Form Designer
  - ◆ Dashboard
  - ◆ Simulation / Test

# ESB – FUSE

**JBoss Fuse - a small foot print, flexible and open source ESB**

## Mobile AERO GEAR

### Bringing Mobile and Enterprise Together!

Libraries to *simplify* and *unify* mobile development across different platforms.

**Web**

Javascript

**iOS**

Objective-C

**Android**

Java

**Hybrid**

Cordova

## Standard Operating Environment

- ◆ Addresses issues through standardization
- ◆ Standardized Operating Environment
- ◆ Standardizing on a productive stack
- ◆ ...robust, maintainable, secure

**Wir gestalten die Geschäftsmodelle  
der Finanzindustrie**
